EXPERIENCE

Python Backend Engineer Intern

Oct 2025 – Present

Techolution

Hyderabad, IN

- Engineered **Agentic AI workflows** (Diff-Edit, Chat with Artifacts) using **FastAPI**, increasing internal developer productivity by **25%** through real-time automated code manipulation.
- Optimized **LLM Orchestration** and system prompts, reducing model hallucination rates by **40%** and decreasing average token consumption per request by **15%**.
- Redesigned **MongoDB aggregation pipelines** for **HarperCollins**, achieving a **30% reduction in query latency** across datasets exceeding **1M+ records**.
- Architected a scalable **ELT pipeline** using **Azure Cloud Storage** and **AsyncIO**, automating the ingestion of **50,000+ documents monthly** for enterprise clients.
- Refactored legacy backend services to **Asynchronous Python**, resulting in an **80% improvement** in API response times and supporting **5,000+ concurrent user sessions** without CPU degradation.

Software Developer Intern

Mar 2024 – Dec 2024

Orchestration Syndicate

TX, USA (Remote)

- Built and launched **Climb**, a flagship AI product, leading to **\$10,000+** in individual project revenue within the first 6 months of deployment.
- Developed a real-time ML pipeline using **Apple ML-4M**, reducing inference latency by **60%** for high-dimensional data processing tasks.
- Integrated **OIDC-based authentication** and optimized session management, cutting user login latency by **45%** and enhancing system security compliance.
- Improved codebase maintainability by implementing **Unit Testing** (Pytest) and **CI/CD pipelines**, reducing production bug reports by **20%**.

TECHNICAL SKILLS

Languages & Databases: Python (Expert), SQL (PostgreSQL), NoSQL (MongoDB, Redis), Java, JavaScript, HTML/CSS

AI & Backend Frameworks: FastAPI, AsyncIO, LangChain, Agent Development Kit, React

Cloud & DevOps: GCP, AWS, Azure, Docker, CI/CD Pipelines, Git, MCP (Model Context Protocol)

Systems & Architecture: Distributed Systems, Microservices, RESTful APIs, RAG, ELT/ETL Pipelines, System Design

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Agile, Unit Testing (Pytest)

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology

Hyderabad, IN

Bachelor of Computer Science and Engineering - 8.99 CGPA

Nov 2022 – Present

PROJECTS

PolicyChat AI – *Python, FastAPI, React, PostgreSQL, Docker, GCloud, AWS, MCP*

View in GitHub

- Developed a secure, AI-powered chatbot leveraging **Google's Gemini API** to extract insights and answer queries from complex documents (PDF, DOCX, PPTX).
- Integrated advanced **natural language understanding** to deliver accurate, context-aware responses for legal and policy content.
- Implemented **Supabase authentication** for user session tracking, enabling personalized, **multi-session** experiences with persistent chat histories.

Focus Center – *Python, FastAPI, React, PostgreSQL, Google-genai, Streamlit*

View in GitHub

- Building a real-time **Agentic AI** powered productivity and focus tracker to help individuals and teams monitor task flow, eliminate distractions, and stay aligned with goals.
- Designed a **modular backend** with **AI-Agent Orchestration**, and **component-driven React frontend** respectively, featuring real-time updates, timer-based task blocks, and performance insights.

CERTIFICATIONS

Cisco Certified Network Associate (CCNA): ITN | SRWE | ENSA

AWS Cloud Virtual Internship: Cloud Foundations | Cloud Architecture
